Spanish (native) and English (B2)

MORE

Since I was 11 years old I have been working in my family business of audiovisual productions, where I developed a solid professional ethic and work commitment. I traveled for two years, making productions and acquiring English skills. During the trip, I met programmers who sparked my interest in coordinated work and web connection to the world. In 2021, I became interested in financial data programming which led me to learn about and focus on web programming.
